

Dibasic Lead Phosphite (DBLP) SCI-165-DBLP

Stabplast's SCI-165- DBLP (Dibasic Lead Phosphite) is a heat stabilizer giving excellent resistance to ultraviolet rays and retention of physical properties after ageing. The product is primarily being used as a light stabilizer that's imparts outstanding weathering resistance to plastics.

SCI -165-DBLP (Di Basic Lead Phosphite) is being used in both rigid and flexible PVC compositions generally in conjunction with Tri Basic Lead Sulphate (SCI-120-HS)

Physical and Chemical Properties

Description	Soft White Powder, Insoluble in Water. Soluble in Hydrochloric and Nitric Acid.
Chemical Formula	$2\text{PbO} \cdot \text{PbHPO}_3 \cdot \text{H}_2\text{O}$
CAS RNo	1344-4-7
Lead Content(as PbO)	88-89%
Specific Gravity	6.0 - 6.5
Molecular Weight	742.57 g/mol
Moisture	1% Max.
Particle Size (Microns)	63 (230 Mesh) (Finer material available on request)
Packing	50 Kg HDPE Bag with Liner.

Samples and Further Technical details available on request

Stabplast's products are manufactured under strict process parameters and standardized procedures to provide finest quality product every time.
